

Problem

Many renewable energy projects that are actually eligible for funding fail because of the equity required.

Other project initiators do not have the know-how for an economic project planning and long-term profitable operation of such plants.

Our Solution

Energiepark March PLC acts as co-financer for selected projects for the construction and operation of biomass CHP plants and provides the necessary capital through financing by means of loans.

Market Volume

Total Turnover 2016: EUR 12.05 Mrd.

Investments in new biomass CHP plants in 2020: EUR 6,93 Bn. (2016: EUR 1.64 Bn.)

Biomass share of electricity generation from RE in 2020: 20,10% (2016: 8,6%)

Biomass share of heat generation from RE in 2020: 85,0% (2016: 11,8 %)

Biomass share of fuel generation from RE in 2020: 87,90 (2016: 4,6 %)

Biomass share of total renewable energy generation in 2020: (2016: 58,9%)

Business Model

B2B financing for biomass cogeneration plants as co-financier
